QFN ACCESSORY KIT

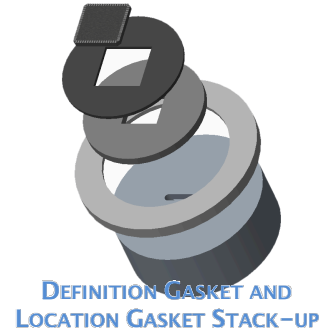

The fixtures in this kit have been optimized to assist the end user with the decapsulation of a wide variety of QFN packages.

Gasket drawings are displayed below in a 1:1 ratio for easy part number selection and reordering.

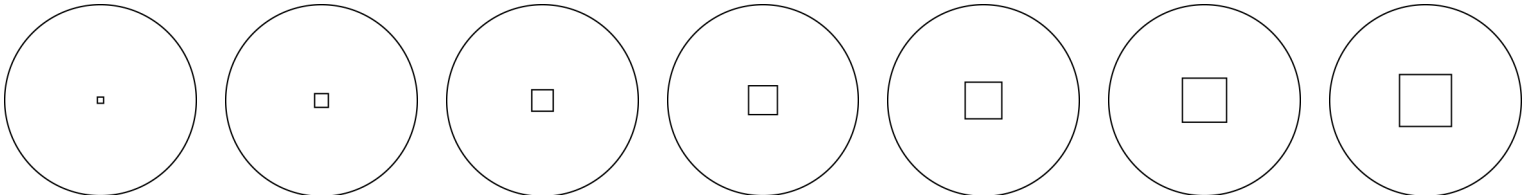

Gasket part number suffix denotes the size of the aperture (mm).

Gaskets in this kit have thicknesses of approximately .070" (1.8mm) and .031" (.8mm).

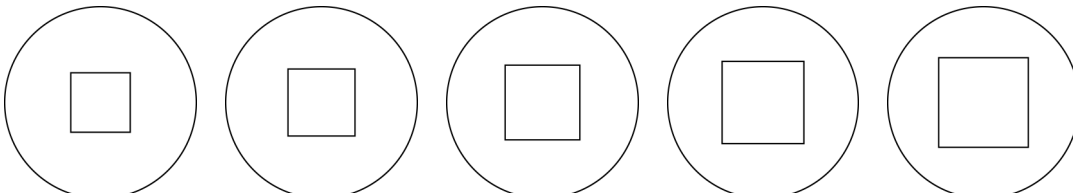

A typical fixture stack-up featuring components found in this kit can be seen in the render above.
